

TERMS OF USE – CERVO’

Last updated: September 18, 2026

These Terms of Use govern access to and use of Cervo’, an application developed and operated under the name Nextarr Labs.

By creating an account, accessing, or using Cervo’, the user acknowledges that they have read, understood, and agreed to these Terms of Use.

If the user does not agree with these Terms, they must not create an account or use Cervo’.

1. PURPOSE OF CERVO’

Cervo’ is a personal information management application designed as an “external brain”.

The service allows users to centralize, organize, store, search, and retrieve personal information in one place.

Depending on the version and features available, Cervo' may allow users to create and manage notes, pages, folders, subfolders, tasks, categories, events, reminders, habits, deadlines, tables, databases, files, images, screenshots, audio content, documents, and other personal information.

Cervo' is intended as a personal organization and information management tool.

Cervo' does not guarantee that the service will replace any professional, legal, medical, financial, educational, or other specialized service.

2. ACCESS TO THE SERVICE

Access to Cervo' requires the creation of a personal account when account-based features are used.

Users are responsible for providing accurate

information when creating and managing their account.

Authentication is currently performed using an email address and password.

Users must keep their authentication information confidential and must not intentionally provide access to their account to another person.

Each account is intended for individual use unless Cervo' explicitly provides another type of account or authorization.

Cervo' may take reasonable measures to protect an account when suspicious, unauthorized, or abusive activity is detected.

3. USER ACCOUNT

The user is responsible for all activity carried out through their account, except where such activity results from unauthorized access that

could not reasonably have been prevented by the user.

The user must notify Cervo' as soon as reasonably possible if they believe that their account has been compromised, accessed without authorization, or otherwise misused.

The user must not attempt to access another person's account or information.

The user must not create an account for the purpose of impersonating another person or misleading other users.

4. USER CONTENT

Users retain ownership of the content they create, upload, or store in Cervo'.

This includes, depending on the features used, notes, pages, files, photographs, screenshots, audio recordings, documents, tasks, events, reminders, habits, and other information

provided by the user.

By using Cervo', the user grants the service only the permissions technically necessary to store, synchronize, display, process, and provide the requested features relating to that content.

This authorization does not transfer ownership of the user's content to Cervo'.

Cervo' does not claim ownership of user-created content.

The processing of personal data associated with user content is governed by the Cervo' Privacy Policy.

5. RESPONSIBILITY FOR USER CONTENT

The user remains responsible for the content they create, upload, store, or otherwise process through Cervo'.

The user must ensure that their use of the

service and their content comply with applicable laws and regulations.

The user must not use Cervo' to store, transmit, distribute, or facilitate content that is unlawful or that infringes the rights of others.

This includes, in particular, content that unlawfully infringes copyright, trademark rights, privacy rights, personality rights, or other intellectual property rights.

The user must not use Cervo' to distribute content that is illegal, fraudulent, threatening, or intended to cause harm to another person.

Cervo' is not responsible for content voluntarily created or uploaded by users.

6. PROHIBITED USE

The user agrees not to:

Use Cervo' for unlawful purposes.

Attempt to gain unauthorized access to the

application, its infrastructure, another user's account, or another user's data.

Attempt to bypass authentication, security mechanisms, access controls, or technical limitations.

Interfere with the normal operation of Cervo'.

Introduce malicious software, harmful code, viruses, or other elements intended to damage or disrupt the service.

Use automated systems, bots, scripts, scraping mechanisms, or similar tools to access Cervo' in a manner that could interfere with the service or circumvent its intended use.

Attempt to reverse engineer, decompile, disassemble, or otherwise extract the source code of Cervo', except where such activity is expressly permitted by applicable law.

Use Cervo' to infringe the rights of another person.

Use the service in a manner that could

reasonably cause damage to Cervo', its infrastructure, its users, or third-party services.

7. PERSONAL USE OF THE SERVICE

Cervo' is designed primarily as a personal productivity and information management service.

The user remains responsible for determining whether Cervo' is appropriate for the type and sensitivity of information they choose to store. Cervo' should not be considered a guaranteed archival system or the sole storage location for information that the user cannot afford to lose. Users are encouraged to maintain appropriate backups of information that is particularly important to them.

8. AVAILABILITY OF THE SERVICE

Cervo' aims to provide a reliable and

continuously accessible service.

However, uninterrupted availability cannot be guaranteed.

The service may occasionally be unavailable due to maintenance, updates, technical failures, infrastructure issues, security incidents, network problems, or circumstances beyond the reasonable control of Cervo'.

Cervo' may temporarily restrict access to all or part of the service when necessary to maintain security, perform maintenance, resolve technical problems, or protect users and infrastructure.

Where reasonably possible, planned maintenance may be communicated in advance.

9. UPDATES AND CHANGES TO THE APPLICATION

Cervo' is an evolving application.

Features may be added, modified, improved,

replaced, or removed over time.

Updates may be necessary to improve functionality, security, compatibility, performance, or compliance with applicable requirements.

The user acknowledges that the version of Cervo' available at a given time may differ from previous versions.

Where a significant change materially affects the user's rights or obligations, the applicable information will be updated accordingly.

10. DATA STORAGE AND SYNCHRONIZATION

Cervo' uses cloud infrastructure to store and synchronize account information and user content.

The service relies primarily on Supabase for authentication, database infrastructure,

synchronization, and storage.

Files and other content may therefore be transmitted between the user's device and the infrastructure used by Cervo' when the user requests features requiring synchronization or cloud storage.

The technical processing of personal data is described in greater detail in the Cervo' Privacy Policy.

Although Cervo' implements security measures designed to protect stored information, no online storage system can guarantee absolute protection against every possible technical failure, security incident, or loss of data.

11. DELETION AND TRASH

Users may delete content from their Cervo' account using the deletion features provided by the application.

Depending on the feature concerned, deleted content may first be moved to the Cervo' trash. Items placed in the trash may remain recoverable for a limited period.

Unless otherwise specified for a particular feature, items placed in the trash are permanently deleted after 10 days.

Once permanent deletion has occurred, the content may no longer be recoverable through Cervo'.

The user is responsible for confirming that they no longer need content before allowing its permanent deletion.

12. ACCOUNT DELETION

Users may request or initiate deletion of their Cervo' account using the account deletion procedure provided by the service.

Account deletion may result in the permanent

deletion of the account and associated content, subject to technical, legal, or security requirements described in the Privacy Policy. Certain information may need to be temporarily retained where required by law, necessary to resolve a dispute, necessary for security purposes, or technically required by backup systems.

Once applicable retention periods have expired, the relevant data will be deleted or anonymized where appropriate.

13. INTELLECTUAL PROPERTY

Cervo', including its software, interface, visual identity, logos, names, graphics, design elements, text, and other elements created or provided by Cervo', is protected by applicable intellectual property laws.

Except where expressly permitted by law or

authorized by Cervo', users may not reproduce, distribute, modify, publicly display, commercially exploit, or create derivative works from Cervo' or its protected elements.

The use of Cervo' does not grant the user ownership of the application, its source code, its visual identity, or its underlying technology.

Nothing in these Terms transfers intellectual property rights from Cervo' to the user, except for the user's own content as described above.

14. THIRD-PARTY SERVICES

Cervo' relies on certain third-party technical services necessary for its operation.

These services currently include Supabase for application infrastructure and Firebase Cloud Messaging for Android push notifications.

Third-party services may have their own terms of use, privacy policies, technical limitations, and

availability conditions.

Cervo' cannot guarantee the uninterrupted operation of third-party services that are outside its direct control.

The use of third-party services by Cervo' does not grant those providers ownership of the user's content.

15. NOTIFICATIONS

Cervo' may provide local or push notifications relating to features configured by the user, including tasks, events, reminders, habits, or other information.

Users can control notification permissions through Cervo' and/or their device settings, depending on the notification type.

Disabling notifications may prevent certain alerts from being delivered but does not necessarily disable the corresponding

underlying feature.

16. PERMISSIONS

Certain Cervo' features may require permissions to access device resources, including photos and files, the camera, microphone, notifications, or other resources supported by the operating system.

The user may accept or refuse these permissions.

Refusing a permission may prevent the corresponding feature from functioning.

The permissions requested by Cervo' are intended to be used only for the features for which they are required.

Additional information regarding personal data and device permissions is provided in the Privacy Policy.

17. SECURITY

Cervo' implements reasonable technical and organizational measures intended to protect the service and user information.

However, no digital service can guarantee absolute security.

Users are responsible for maintaining the confidentiality of their account credentials and for using an appropriate level of security on their device.

Users should keep their device protected by appropriate security measures, including a secure screen lock and up-to-date operating system where possible.

18. LIMITATION OF LIABILITY

To the maximum extent permitted by applicable law, Cervo' cannot be held responsible for

indirect losses, loss of opportunity, loss of anticipated benefits, or other indirect consequences resulting from the use or inability to use the service.

Cervo' cannot guarantee that the service will always be free from errors, interruptions, vulnerabilities, or technical failures.

Cervo' is not responsible for losses resulting from the user's failure to secure their account, device, authentication information, or important content.

Nothing in these Terms excludes or limits liability where such exclusion or limitation is prohibited by applicable law.

19. NO GUARANTEE OF DATA RECOVERY

Cervo' implements mechanisms intended to maintain and synchronize user data.

However, users acknowledge that technical incidents can occur.

Cervo' therefore does not guarantee that deleted, corrupted, inaccessible, or otherwise lost content can always be recovered.

Users remain responsible for maintaining independent copies of particularly important information when necessary.

20. SUSPENSION OR TERMINATION

Cervo' may temporarily suspend or restrict access to an account when reasonably necessary to protect the service, its infrastructure, or other users.

Such action may be taken in cases of serious violation of these Terms, unauthorized access attempts, fraudulent activity, abuse, security threats, or unlawful use of the service.

Where appropriate and technically possible,

Cervo' may provide information concerning the reason for a restriction.

Account termination does not remove the user's legal obligations that arose before termination.

21. CHANGES TO THESE TERMS

These Terms of Use may be updated when necessary, including when Cervo' introduces new features, changes the service, or when legal or regulatory requirements evolve.

The latest version will be made available through the service.

The date of the latest update will be indicated at the beginning of the document.

Where a substantial change requires specific user information or acceptance under applicable law, the appropriate procedure will be implemented.

22. GOVERNING LAW

These Terms of Use are governed by applicable French law, subject to any mandatory consumer protection rules that may apply to the user in their country of residence.

Nothing in these Terms is intended to deprive consumers of rights that cannot legally be excluded or limited.

23. DISPUTES

In the event of a dispute concerning the use of Cervo', the parties are encouraged to first attempt to resolve the matter amicably.

Consumers retain all mandatory rights available to them under applicable consumer protection laws, including any applicable alternative dispute resolution or judicial remedies.

Nothing in these Terms prevents a user from

exercising rights before a competent court or authority.

24. SEVERABILITY

If any provision of these Terms is found to be invalid, unlawful, or unenforceable, the remaining provisions will remain in full force and effect to the extent permitted by applicable law.

The invalid provision will be interpreted or replaced, where legally possible, in a manner that most closely reflects its original purpose.

25. ENTIRE AGREEMENT

These Terms of Use, together with the Cervo' Privacy Policy and any additional terms expressly applicable to specific features, constitute the framework governing the user's use of Cervo'.

In the event of a conflict between these Terms

and mandatory applicable law, the mandatory legal provisions shall prevail.

26. CONTACT

For questions concerning these Terms of Use, the operation of Cervo', or the user's rights, users may use the official contact method made available by Cervo' in the application or in its legal information.
