

PRIVACY POLICY — CERVO'

Last updated: September 18, 2026

This Privacy Policy explains how Cervo', developed and operated under the name Nextarr Labs, collects, uses, stores, and protects users' personal data.

Cervo' is a personal management application designed as an "external brain". It allows users to centralize, organize, search, and retrieve personal information such as notes, pages, files, images, screenshots, tasks, events, reminders, habits, and other content added by the user.

Data protection and the privacy of content stored in Cervo' are fundamental principles of the service. Data is processed only for the purposes described in this Privacy Policy and in accordance with the General Data Protection Regulation (GDPR), the French Data Protection

Act (Loi Informatique et Libertés), and other applicable laws and regulations.

1. OPERATOR AND CONTACT

Cervo' is developed and operated under the name Nextarr Labs.

For any request concerning personal data, its processing, or the exercise of rights provided under the GDPR, users may use the official contact method made available by Cervo'.

2. DATA COLLECTED

Cervo' collects and processes only the data necessary to operate the features provided or voluntarily supplied by the user.

When creating an account, Cervo' processes, in particular, the user's email address, authentication information required for login, a unique identifier associated with the account,

and profile information provided by the user. Depending on the features available in the application, the profile may include a display name, an “@handle”-type username, and a profile photo.

Cervo’ uses authentication by email address and password. Cervo’ does not currently offer authentication through a Google account or any other third-party identity provider.

Passwords are not intended to be stored in plain text. They are processed by the authentication system used by Cervo’.

3. PERSONAL CONTENT STORED IN CERVO’

Cervo’ allows users to store personal content in their personal space.

This content may include notes, pages, folders and subfolders, tasks, categories, events,

reminders, habits, deadlines, tables, databases, and other information voluntarily entered by the user.

This data is processed to allow its creation, storage, synchronization, display, modification, organization, and search.

Content stored in Cervo' is associated with the user's account and is not intended to be made public by default.

Cervo' does not sell users' personal content and does not use it for targeted advertising.

4. FILES, IMAGES, AND OTHER IMPORTED CONTENT

Cervo' allows users to add different types of content from their device.

Depending on the features available, this may include images, photographs, screenshots, audio files, documents, attachments, and other

files voluntarily selected by the user.

When a user chooses to import a file, it may be transferred to the storage infrastructure used by Cervo' in order to allow it to be stored and accessed through the application.

Files associated with an account are stored in private storage areas and are not intended to be publicly accessible.

Cervo' does not automatically scan all files present on the user's device. Access to files and device content occurs only when a feature requires it and within the limits of the permissions granted by the user.

5. DEVICE PERMISSIONS

Certain Cervo' features may require access to protected resources on the user's device.

Depending on the features being used, Cervo' may request access to photos and files, the

camera, the microphone, and notifications.

These permissions are controlled by the device's operating system. Users may accept or refuse a permission and, where supported by the operating system, modify their choice later in the device settings.

Refusing a permission may prevent the use of the related feature without necessarily preventing the use of other Cervo' features.

Cervo' does not request access to a device resource solely for the purpose of collecting it. A permission is requested when it is necessary for a feature provided or activated by the user.

This approach is consistent with the recommendations of the French data protection authority (CNIL), which recommends limiting permissions to necessary access and clearly informing users of their purpose.

6. LOCATION DATA

Cervo' may allow users to save location information in their personal space when using a feature that allows a location to be stored or associated with content.

Location data is not used for advertising, advertising profiling, or resale purposes.

When a location is saved by the user, it is considered part of their personal content and is processed according to the same privacy principles as other information stored in Cervo'. Access to the device's location, when required by a feature, is subject to the permissions provided by the operating system. When location data is not necessary for the operation of a feature, it must not be collected without an appropriate legal basis. The CNIL notably states that consent is generally required when geolocation is not strictly necessary for the requested service.

7. NOTIFICATIONS

Cervo' may use local notifications and push notifications to inform users about their tasks, events, reminders, habits, or other items they have configured in the application.

For Android push notifications, Cervo' uses **Firebase Cloud Messaging (FCM)**.

When push notifications are enabled, a technical identifier or token required to deliver notifications may be processed in order to send the notification to the correct device.

Notification settings may be modified by the user within Cervo' or through their device settings.

8. TECHNICAL AND SECURITY DATA

As part of the normal operation of the service, certain technical information may be processed

by Cervo' or its technical service providers.

This information may include technical identifiers, session-related information, information required for authentication, technical data relating to the operation of the service, and certain information necessary to maintain infrastructure security.

This information is used, in particular, to maintain the service, ensure its security, detect unauthorized access, prevent abuse, and resolve technical issues.

Cervo' does not use this information to create advertising profiles.

9. NO ADVERTISING OR ADVERTISING TRACKING

Cervo' currently does not contain targeted advertising.

Cervo' does not use systems intended to create

an advertising profile of users and does not sell users' personal data to advertisers or data brokers.

Cervo' currently does not use third-party analytics or advertising-tracking tools intended to monitor user behavior for advertising purposes.

Any significant change to this policy will be addressed before introducing a new processing activity of this nature.

10. USE OF ARTIFICIAL INTELLIGENCE

As of the date of this Privacy Policy, Cervo' does not use any external artificial intelligence service to analyze, generate, summarize, index, or process users' personal content.

No user content is currently transmitted to an artificial intelligence provider as part of an AI feature within Cervo'.

If an artificial intelligence feature is subsequently integrated into Cervo', this Privacy Policy will be updated before or upon its deployment to specify the data concerned, the purposes of processing, any providers used, any applicable transfers, and the rights available to users.

11. PURPOSES OF PROCESSING

Personal data processed by Cervo' is primarily used to provide the application's features.

This includes account creation and management, authentication, data storage and synchronization, access to personal content, organization and search, file management, sending notifications requested by the user, and securing the service.

Certain technical data may also be used to maintain service availability, detect errors,

prevent abuse, and protect accounts and infrastructure.

Personal content may be processed to enable the features specific to Cervo's "external brain" concept, including the search and retrieval of information stored by the user.

12. LEGAL BASES

Processing activities necessary to provide Cervo' and perform the features requested by the user are primarily based on the performance of the agreement between the user and the service.

Certain processing activities may be based on the user's consent, particularly when an optional device permission is required or when a specific processing activity can only be carried out following the user's choice.

Processing necessary to secure the service,

prevent abuse, and protect infrastructure may, where the applicable conditions are met, be based on legitimate interests.

Certain processing activities may also be carried out when necessary to comply with a legal obligation.

Where processing is based on consent, the user may withdraw that consent at any time.

Withdrawal of consent does not affect the lawfulness of processing carried out before the withdrawal.

13. TECHNICAL SERVICE PROVIDERS

Cervo' relies on technical service providers necessary for the operation of the application.

The primary infrastructure provider used by Cervo' is Supabase.

Supabase provides services necessary for authentication, database management,

synchronization, and storage of data and files associated with Cervo' accounts.

Cervo' also uses **Firestore Cloud Messaging**, provided by Google, to deliver Android push notifications.

These providers may process certain data necessary to provide their services as part of their relationship with Cervo'.

Processing carried out by these providers is governed in accordance with applicable data protection requirements.

14. INTERNATIONAL DATA TRANSFERS

Depending on the infrastructure used by Cervo's technical service providers, certain data may be processed or transferred to countries located outside the European Union or the European Economic Area.

Where such transfers take place, Cervo' ensures that they are governed by a mechanism recognized under applicable law, including an adequacy decision, Standard Contractual Clauses, or another appropriate safeguard where required.

The actual location of data depends, in particular, on the configuration of the infrastructure used by Cervo' and changes to its providers' services.

15. DATA RETENTION

Account data is retained for as long as necessary to operate the account and provide the service.

Content created or imported by the user is retained for as long as the user keeps it in their personal space, subject to the deletion rules applicable to each feature.

When content is moved to the Cervo' trash, it may remain temporarily available to allow restoration. Items placed in the trash are permanently deleted after 10 days, unless otherwise required by technical or legal circumstances.

Data necessary for security, abuse prevention, or compliance with legal obligations may be retained for as long as necessary for those purposes.

Data that is no longer necessary is deleted or, where appropriate, anonymized.

16. ACCOUNT DELETION

Users may delete their Cervo' account through the deletion procedure made available within the application or through any other method provided for this purpose.

Deleting an account results in the deletion of the

personal data and content associated with it, subject to data that must be retained due to a legal obligation, dispute, security requirement, or temporary technical constraints related to backup systems.

Deleting an account should not be confused with simply logging out or temporarily deactivating an account.

Cervo' provides a procedure allowing users to request deletion of their account and the data associated with it. This requirement is also established by Google Play rules for applications that allow account creation.

17. RIGHT OF ACCESS

Under the GDPR, users may request confirmation as to whether personal data concerning them is being processed by Cervo'. Where the applicable legal conditions are met,

users may obtain a copy of their personal data as well as information concerning its processing.

18. RIGHT TO RECTIFICATION

Users may request the correction of inaccurate or incomplete personal data.

Where information can be directly modified within Cervo', users can generally make the change themselves using the features provided for this purpose.

19. RIGHT TO ERASURE

Users may request the deletion of their personal data where the conditions provided for by the GDPR are met.

This right may notably be exercised when the data is no longer necessary for the purposes for which it was collected or when processing is based on consent that has been withdrawn and

no other legal basis allows the data to be retained.

Certain data may nevertheless be retained where its retention is required or permitted by law.

20. RIGHT TO RESTRICTION OF PROCESSING

In the situations provided for by the GDPR, users may request restriction of the processing of their personal data.

During the restriction period, the data concerned may only be processed under the conditions provided for by applicable regulations.

21. RIGHT TO OBJECT

Where processing is based on legitimate interests, users may object to such processing on grounds relating to their particular situation,

in accordance with the conditions provided for by the GDPR.

Cervo' does not currently carry out advertising processing based on user profiling.

22. RIGHT TO DATA PORTABILITY

Where the conditions provided for by the GDPR are met, users may request to receive the personal data they have provided in a structured, commonly used, and machine-readable format.

Where technically possible and legally applicable, users may also request that this data be transmitted to another data controller.

23. EXERCISING YOUR RIGHTS

Any request relating to rights provided under the GDPR may be submitted to Cervo' through the official contact method made available within the application or in the service's legal

information.

To protect accounts and personal data, Cervo' may request information reasonably necessary to verify the identity of the person making a request.

Requests are handled within the time limits provided by applicable law. In principle, a response is provided within one month of receiving the request. This period may be extended under the conditions provided by the GDPR when the request is particularly complex.

24. RIGHT TO LODGE A COMPLAINT WITH THE CNIL

If a user believes that their data protection rights have not been respected after contacting Cervo', they may lodge a complaint with the Commission nationale de l'informatique et des libertés (CNIL), the French data protection

authority.

Information concerning the CNIL and how to lodge a complaint is available on its official website: <https://www.cnil.fr/>

25. SECURITY

Cervo' implements technical and organizational measures designed to protect personal data against unauthorized access, loss, destruction, alteration, or unauthorized disclosure.

These measures include, in particular, authentication security, session management, access controls, separation of data between accounts, secure network communications, and security mechanisms provided by the infrastructure used.

Private files and content are stored in areas designed to prevent unauthorized public access. Despite the measures implemented, no

computer system or electronic transmission method can guarantee absolute security.

26. SENSITIVE DATA

Cervo' does not require users to provide data belonging to the special categories of personal data defined by the GDPR in order to use its general features.

However, content that users voluntarily choose to store in Cervo' may contain personal or potentially sensitive information.

Users remain responsible for the information they choose to store in their personal space.

Cervo' recommends that users avoid storing particularly sensitive information when it is not necessary for their personal use of the service.

27. MINORS

Cervo' currently does not impose a specific age

limit for using the application.

However, the use of Cervo' by minors remains subject to the legal requirements applicable in their country of residence, particularly regarding consent to the processing of personal data where consent constitutes the applicable legal basis.

Where regulations require the involvement or authorization of a legal representative, the corresponding requirements must be respected.

28. THIRD-PARTY SERVICES

Cervo' may rely on third-party services necessary for its technical operation, including Supabase for application infrastructure and Firebase Cloud Messaging for push notifications.

These services have their own privacy policies and terms of use.

Cervo' does not control processing carried out

independently by these providers when they act for their own purposes.

Where a provider acts on behalf of Cervo' to provide a service necessary for the application, its access to data is limited to the processing necessary for that function, in accordance with applicable requirements.

29. CHANGES TO CERVO' AND THIS PRIVACY POLICY

Cervo' is an evolving application. New features may be added and existing features may be modified.

Any change likely to result in new processing of personal data or substantially modify existing processing activities will result in an update to this Privacy Policy.

Where a change requires specific information or consent from the user, the user will be informed

in accordance with applicable law.

The date of the latest update is displayed at the top of this Privacy Policy.

30. CERVO' PRIVACY PRINCIPLES

Cervo' is designed around the principle of data minimization: personal data should only be processed when necessary for the operation of a feature or when voluntarily provided by the user.

Personal content stored in Cervo' is intended to remain private.

Cervo' does not sell users' personal data and does not use their content to create advertising profiles.

Users retain control over their content and benefit from the rights provided by the GDPR regarding their personal data.
